"The Wastemakers" by Vance Packard described the many wasteful habits of Americans. We probably waste more of our natural resources than any other nation; waste and greed are the engines that drive the capitalistic economic system.

The cost of lighting our homes is approximately 15% of the electric bill. Replacing lamp bulbs with 7 1/2 watt bulbs uses less power than either the compact fluorescent (CFL) or light emitting diode (LED) light bulbs. The following pictures depict light bulbs used in my home wherein I have reduced my lighting cost approximately 90%!

**Fig. 1** shows a 14 watt CFL, 9 watt LED and the 7 1/2 watt "night light" I used to only illuminate walking surfaces

Fig. 1

**Fig. 2** shows the 25 watt clear tubular and globe "frosted" bulbs used with a dimmer switch to reduce the light and extend the bulb life 20 times when the wattage is reduced in half to 12.5 watts.

Fig. 2

**Fig. 3** shows the 4 and 7 watt candelabra base bulbs used in the "bag lights" described in last month's IO article. (see pg. 16)

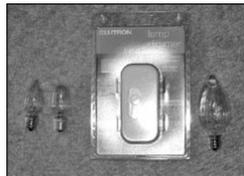

Fig. 3

**Fig. 4** shows the manual switched night light used in the "bag light" and the automatic on/off night light used to provide safety in bedrooms and bathrooms.

Fig. 4

**Figs 5** show how the Lutron dimmer switch can be added to any lamp by cutting the lamp cord, after removing the plug from the wall; outlet, inserting each end of the wire in the dimmer switch and pressing two extended movable tabs to lock and crimp each end of the cord.

Fig. 5

See page 16 to order the standard and long life "bag lights", the automatic and manual night lights, the 4, 7, or 15 watt candelabra base light bulbs, dimmer switch or the 7 1/2 and 25 watt clear tubular standard screw-in base light bulbs in order to significantly reduce your lighting expense and conserve energy. Cost should be recovered in less than two months!

**Be a "bright bulb" rather than a "dim bulb dim wit!"**

# Rotary International Joins Bill Gates to Implement the "Great Culling"

By: Anne Wilder-Chamberlain, Idaho-Observer.com

Rotary International has raised \$200 million to eradicate polio through vaccination, Rotary announced at its annual Assembly in San Diego in mid-February. This is in response to a \$355 million challenge grant from the Bill and Melinda Gates Foundation.

This is pretty disconcerting, since the likelihood of "eradicating" polio by feeding polio virus to people is about the same as that of eradicating Eurasian Water Milfoil by dumping it into rivers. Administration of the oral polio vaccine in the US was abandoned due to the revelation that the live polio virus it often contained caused more polio than it prevented, and that, since it was made from monkey kidney, it also contained a monkey virus called SV-40 which causes cancer. The cancer rate in this nation has skyrocketed since 1955 when the OPV was mandated. In 1977, Jonas Salk, inventor of the polio vaccine, testified before a Senate subcommittee that virtually all polio outbreaks since 1961 were caused by the oral polio vaccine.

In addition, studies of polio incidences from as early as 1900 have demonstrated a link between such incidences and proximity to farms spraying arsenic-based pesticides. In the last 60 years researchers have also tied polio incidences to radiation from nearby nuclear testing. Unless Rotary can eliminate the causes of polio, it won't be able to eliminate the disease.

Third, when it comes to Bill Gates and his obsession with population control through destroying human sperm and other means, it's hard to even know where to begin. His investments include genetically modified food (which causes sterility in the third generation), mosquitoes genetically engineered for sterility, and now vaccines. The tetanus version has been documented as containing an ingredient that has caused widespread sterility in third world countries, which is why those countries reject this "cultural misunderstanding about the eradication campaign," as our newspaper has stated. Bill Gates also funds ultrasound technology, particularly a device that can sterilize a human man for six months by blasting his scrotum with high-frequency ultrasound. This is the same ultrasound parents today use to look at their baby boys in utero.

Microsoft has now teamed up with Merck, becoming a global "drug development partner" with the world's largest vaccine manufacturer. Merck is the same corporation that developed the Gardasil vaccine that has killed as many as 68 little girls as well as paralyzed and given genital warts to countless others, while not preventing a single case of cervical cancer on record. Microsoft and Big Pharma are focusing on gene-targeting technology that could be used to develop race-specific bio-weapons that would kill only people of a certain color or genetic type.

Not that Bill Gates' depopulation agenda is race specific. This is a guy who openly admitted on stage in front of a live audience that if the medical industry does a "really great job" with vaccines and "health" care, we can "lower the population by perhaps ten to 15 percent." And Rotary International, an organization of 1.22 million members with a stated purpose "to provide humanitarian service, encourage high ethical standards in all vocations, and help build goodwill and peace in the world," is working hand in hand with him to deliver on that projection.

The global depopulation agenda is hiding in plain sight. The monsters who are pushing to depopulate the planet are telling you right out in the open how they're planning on killing you with vaccines and government/pharmaceutical-sponsored mandatory "health" care. It's all a big IQ test to see if you're paying attention enough to save your own life and avoid being part of the great culling.
