The MOST Dangerous Assault on Private Property

By: Tom DeWeese, President American Policy Center

The most dangerous assault on private property in the history of the United States has just been launched by Barack Obama. Your home... your neighborhood... your freedom of choice are in the crossfire. And I'm doing everything I can to stop it. Let me explain.

As I've warned for 25 years: Agenda 21 promised to "reorganize human society."

People scoff and ask, "how is that possible?"

For most of those years ranchers, the timber industry and folks living in rural areas have learned – they do it by making it impossible to live on the land. Rules, regulations, fines. That's how. And many of those rural people were forced to move into the cities. But folks living in the cities weren't yet feeling the pressure. They couldn't see the danger. So they ignore the warnings.

Worse, inside the cities, elected officials on city councils and county commissions ignored the warnings too as they enforced Agenda 21 reorganization programs like Smart Growth and created "Comprehensive Development" plans to dictate how we all should live inside the cities. When we said this was part of Agenda 21 they laughed, they rolled their eyes and they insisted "these plans are all LOCAL!"

Barack Obama's tyrannical government is accelerating the drive to fully impose Agenda 21/Agenda 2030 through the most outrageous, dangerous attack on private property and local home rule ever seen on our American soil. The code word for this attack is "FAIR HOUSING." The name of the attack is "AFFIRMATIVELY FURTHERING FAIR HOUSING." Or "AFFH" for short. The federal agency chosen to lead this assault on your life to fulfill the Agenda 21 promise to reorganize human society is the **Department of Housing and Urban Development – HUD.**

Here are the direct threats to you, your home, your neighborhood and your community coming from HUD'S AFFH attack:

In the name of "fair housing," HUD is strip searching every neighborhood in the nation to determine the income levels, race, color, national origin, religion, sex, disability and family status.

Next HUD has created a profile for each neighborhood to determine how many of those "protected classes" should be in each neighborhood.

If your neighborhood fails the test, then HUD insists that your neighborhood is "out of balance" and must be fixed!

How is that to be done?

By forcing "integration" of people from low income neighborhoods into "upscale" neighborhoods.

How is that done?

Three ways.

1. Public pressure.
2. Law suits.
3. Federal dictates over local home rule.

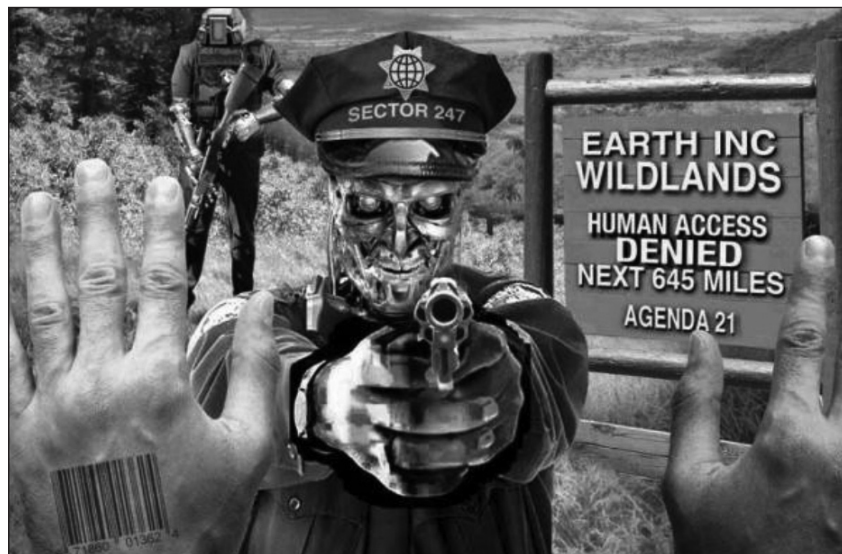

JOIN US IN OUR FIGHT AGAINST HUD'S AFFH

More specifically, it works like this.

HUD is forcing local communities to work with third party groups to create their planning programs. There are so-called civil rights groups that are all "left-of-center" organizations. These groups then begin to agitate that affluent neighborhoods are "unfair" because people living there have more than those living in poor neighborhoods! They demand that federal subsidized low income, housing be built in those upscale neighborhoods. HUD files law suits. The civil rights organizations file law suits. The news media is then filled with false reports of unfair housing practices by local officials. Riots may break out. Imagine Al Sharpton, Jesse Jackson and Black Lives Matter demonstrating in your neighborhood.

This is the absolute destruction of private property rights.

It is the destruction of property values that you have worked so hard to build. And watch the peace and safety of your neighborhood disappear. And you aren't even allowed to say such things. In fact, under AFFH rules, Real Estate Brokers are no longer allowed to use such terms as "safe neighborhoods;" "good schools;" or even that the home is

close to a "house of worship."

That's RACIST says HUD.

This is Agenda 21 social engineering of human society!

JOIN US IN OUR FIGHT AGAINST HUD'S AFFH

Already Baltimore, Maryland, West Chester County, New York and Marin County, California have lost such law suits. And many more are in the works.

But the worst threat of AFFH is that it is the destruction of local home rule.

Now HUD agents dictate to your local officials about how your community will be developed! It won't matter who you elected to local office – they will have no say in such matters.

CONTINUED FROM PAGE 6

Frankly, AFFH is far worse than anything I have ever warned you about.

Every community that has or will take a grant from HUD for development is subject to these AFFH rules.

There is some good news in all of this destruction.

Second, several communities have taken steps to stand up to HUD and some are winning.

I see those as very encouraging signs that finally we are starting to be heard. And local officials are willing to take the necessary action to restore local rule and security in our homes.

I am rushing to unite with other activists to devise effective plans to stop AFFH – and to get that information into the hands of local officials who seek our help.

American Policy Center is the best organization in the nation that is equipped to fight back against AFFH. That's because I have fought all along to protect property rights.

I believe we have that chance to stop it. But it is a very narrow opportunity that won't last if HUD gets completely entrenched with AFFH.

Right now HUD is testing – seeing how much they can get away with. Now is the time to show them they can't do this to our homes and our communities.

Will you help me be strong to lead this fight?

JOIN US IN OUR FIGHT AGAINST HUD'S AFFH

With your support, in spite of how powerful and determined HUD is - I know we can stop them. It has been done in a few communities so far. We need to teach others how to do it.

I just need your continued support to fuel my efforts. American Policy Center will produce a full plan of action for every local official and activist that is now ready to fight.

I have said for 25 years that Agenda 21 is built on a house of cards – a house of lies. And if it could just be revealed to enough people then it could easily be blown down in an instant and freedom restored.

My friend – let your support of the American Policy Center BE THE WIND!

Sincerely,

Tom DeWeese

Stratospheric Aerosol Geoengineering Chemtrails / Contrails

CONTINUED FROM PAGE 5

WWII. I would point out that it is after WWII that our government began actively testing chemical and bacteriological weapons, it is also when these maladies began to blossom; it is after 1940 that they began testing such weapons on the population. It was not until 1938 that Fort Detrick MD became operational, and it was not until the 40's that large scale military testing of chemical weapons systems began. ("A Terrible Mistake" the murder of Frank Olson and the CIA secret cold war experiments ISBN 0-9777953-7-4, 826-pp) In that book there is ample evidence of government murders, forced drug addiction, long-term use of LSD for interrogation and to alter people's minds, as well as sundry skullduggery. The outcome of many of these aerosols is asthma, cardiac deaths, cancer, chronic bronchitis, lung cancer and often a multiplicity of those maladies. The use of these aerosols by government is a deleterious effect on the entire populations general welfare and the collective health of the nation. Major diseases, surely partially attributable to atmospheric conditions, according to the CDC are:

- 1) Coronary Heart Disease (leading cause of death in America)
- 2) Asthma (estimate 125 million Americans suffer from it)
- 3) Damaged Lung function caused by micron particulate matter in the atmosphere (pollution) of about one micron) in no small part caused by chemtrail seeding.

It is more than just apparent that any of these illnesses are closely related to air born matter that may have been introduced by man. The fact of the matter is that our immune systems are obviously under continuous attack by various issues and chemtrail-produced add-ons are just additional toxins added to our problems. Not only do we breathe these man-induced toxins, our skin is the largest organ of our body and is a permeable membrane thus exposure is much broader than most people think. Exposure to rain, showers when washing, bathing, thus all increase exposure to chemicals that are man made and introduced into the atmosphere. It is high time to ask some serious question of elected officials and to demand answers we have asked congressman Vern Buchanan (R. FL) numerous times and were never accorded an answer.
